To Whom It May Concern:

My name is (b)(6) and I am the V.P. of Operations for Umarex USA. We are located in Fort Smith Arkansas and we are an importer and distributor of firearms, firearms accessories, firearms ammo, blank firing guns, airsoft guns and paintball guns.

The paintball / powder ball guns we import and distribute are used mainly for law enforcer & military training, as well as high end gaming. We have had numerous requests and opportunities for a pepper ball that can be shot from our paintball guns from law enforcement customers

With that being said, we have a source in China that is producing a powder ball for our guns that we import currently. They also produce a pepper ball that they produce and sell throughout the world. We would like to import and distribute the pepper balls to our law enforcement customers here in the US. Please find included samples of the .68 & .43 caliber pepper balls for your evaluation and we request your approval to import and distribute this product into the US for distribution to our law enforcement customers. The product is produced from a complete organic material and we have included the MSDS sheets for this product as well.

Thank you very much for your time and we look forward to your determination on importation of this product.

Sincerely,

(b)(6)

You will be receiving, by UPS,
a package containing an air rifle
manufactured by evanix.

We, Saeilo (Kahr Arms) are
considering whether to import and sell
these.

I am sending it to you, to see
if ATF has any issue concerning
suppression.

Thank you for your work.

Regards,

(b)(6)

Corp. Counsel.

It is our intention to manufacture a casting of an ar-15 lower receiver. Attached to this letter is a previous letter that sent to Tactical Machining by the Firearms and Technology Branch stating what is required to ensure that the Casting is not considered a firearm?

I would like to inquire as to the necessity of requesting a determination on such an item given that the determination has been given to another company already and we are following it to the letter.

If it is unnecessary to have a determination that is identical to another company please let me know.

If it is necessary I would like to an official determination for our version of this product.

This letter is accompanied with our prototype that follows the attached letter to TM's Letter. Thank you for your time.

Dear FTB,

Received:
TWO Receivers
(AR-15 Lower)

I would like to request a classification of the enclosed partially completed AR-type receiver that my company is planning to manufacture. I would like to know if this item would be classified as a "firearm" under the Gun Control Act of 1968 (GCA).

Thank you for your time.

Sincerely,

(b)(6)
